Presenting

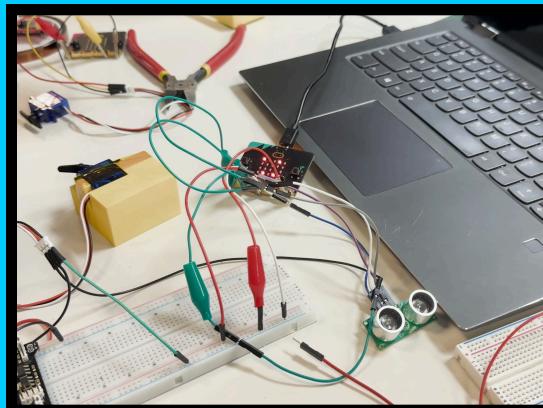

We are **hack.sv**. We regularly organize high school hackathons in the San Francisco Bay Area.

Our mission is to create events where tech-passionate teens can connect and learn with like-minded peers.

hack.sv is a student-run nonprofit based in the Bay Area. We organize hackathons where high school students come together to build projects, learn new skills, and form meaningful connections. Through hands-on workshops and team-based challenges, attendees explore technology in a collaborative and supportive environment. We're not just running events, we're building a community where tech-driven teens can create, learn, and grow together.

hack.sv 2025

Our next flagship event

The theme? To build **real-world** AI applications on hardware devices, using only **local inference** and no reliance on cloud services.

Attendees will need to optimize their projects to run completely offline on limited hardware, mimicking real-world constraints.

hack.sv is the first local AI inference hackathon for high schoolers.

We aim to teach real world skills that are important in the AI era, empowering attendees to build something they're truly proud of and would share with their friends and family.

At many hackathons, recorded demos, mock ups, and slideshows overshadow technical achievement. At hack.sv, we would like to reward innovative concepts that actually work.

Our mission is to allow attendees to walk out of hack.sv knowing they've built something meaningful, not just another fragile ChatGPT wrapper with a fancy UI.

Previous Hackathons

Here's some hackathons we've organized in the past.

Counterspell Silicon Valley was a two-day game jam where attendees built games to the theme "You are your own enemy" in a limited timeframe. Teens made the artwork and music for their games themselves. For many, this was their first time ever touching game development.

89 Attendees • 24 Projects

"I had a lot of fun at the event, and learned a lot as well"

-Attendee

"You made the space feel welcoming with little challenges, swag, and great food. It was fun and productive." -Attendee

**41 Attendees
14 Projects**

Scrapyard Silicon Valley was a 12-hour hardware hackathon where high schoolers prototyped and built inventive projects. What made Scrapyard unique was our focus on physical creation. We provided extensive hardware, including microcontrollers, sensors, and access to tools like 3D printers, giving teams everything they needed to bring their ideas to life.

Why sponsor us

Our mission is to inspire the next generation of developers to create meaningful impact in the AI era. Our motto is "Create, Compete, Connect". During hack.sv, we hope attendees can create fascinating local AI tools, compete against other high schoolers, and connect with like-minded tech-passionate individuals in the Bay Area.

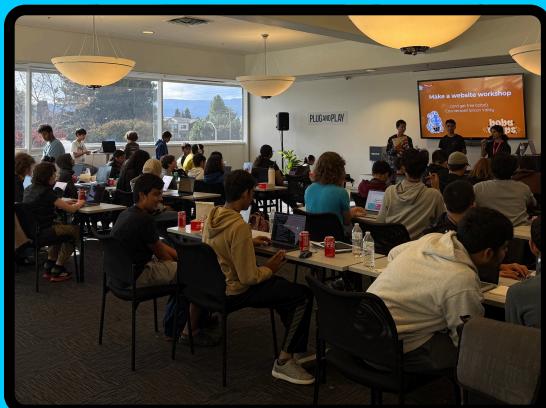

Your contributions will be tax-deductible, as we qualify as a pending 501(c)(3) (EIN: 81-2908499). Please schedule a meeting with us for more details regarding sponsorship deals and tax-deductibility. We appreciate all donations, whether cash, hardware, prizes, or beyond!

Your funds will be used to make hack.sv possible. We will use sponsorship funds to:

- Provide meals, snacks, and drinks to fuel our participants
- Offer exciting prizes to motivate participants to build incredible projects
- Fund hardware to allow attendees to build amazing hardware projects
- Cover other essential operating costs for hosting the event such as venue fees

Any funds leftover at the end of the event will be used to host future events like this one. All our finances are public, and you can view them [here](#).

On behalf of all our participants, thank you for considering sponsoring hack.sv and funding the future of teenagers in STEM!
